

## nFront Web Password Change™

nFront Web Password Change is a password change portal for Windows Active Directory users which is "nFront Password Filter" aware.

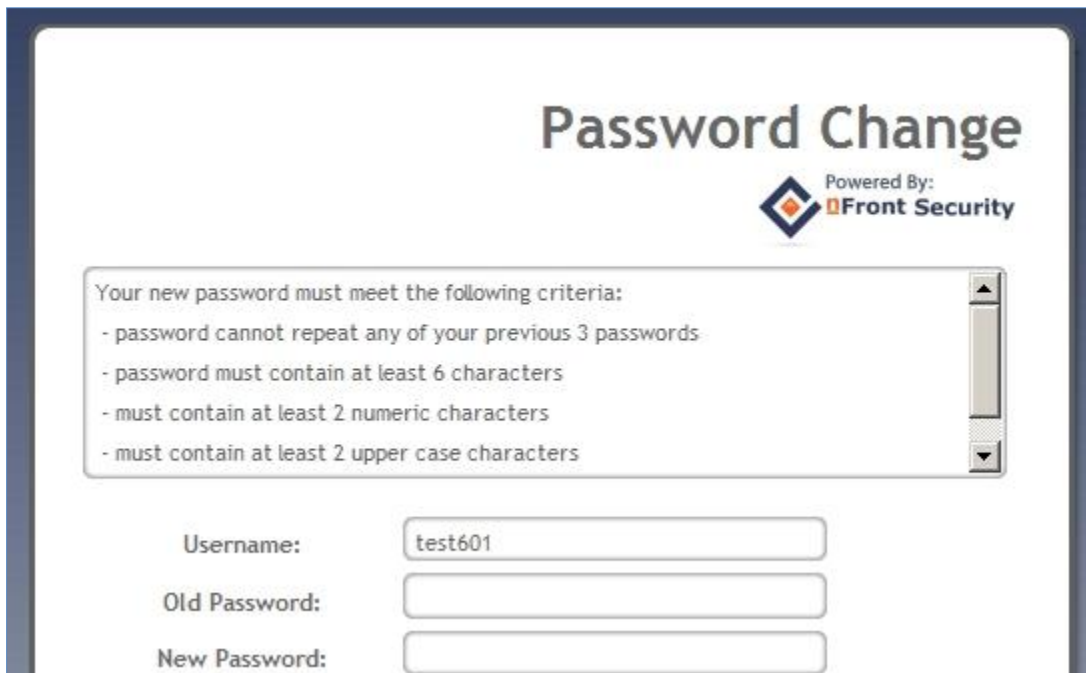

### Benefits

- No helpdesk calls from users who are not aware of exact password policy requirements.
- Great solution for offsite users or VPN users who need to change their password.
- No client to load on each workstation.
- Install in minutes with no need to reboot.

### Simplicity

- Install in 5 minutes
- No configuration needed.

**Download evaluation copy from [nFrontSecurity.com](http://nFrontSecurity.com) and test in minutes.**

The screenshot shows a web interface titled "Password Change" with the nFront Security logo and "Powered By: nFront Security" text. Below the title, a scrollable box lists password criteria: "Your new password must meet the following criteria: - password cannot repeat any of your previous 3 passwords - password must contain at least 6 characters - must contain at least 2 numeric characters - must contain at least 2 upper case characters". At the bottom, there are three input fields: "Username:" with the value "test601", "Old Password:", and "New Password:".
